Dear Colleagues,

The Emirates Society of Ophthalmology (ESO) was formed by pioneering UAE Ophthalmologists as a society within the Emirates Medical Association (EMA). Over the years, the Emirates Society of Ophthalmology grew in membership and activities under the umbrella of the EMA, promoting and advancing the field of Ophthalmology.

ESO is now responsible for supervising and conducting scientific trainings, events, and conferences as well as collaborating with health organizations. ESO launched its work through its competent supervisory, executive and specialist boards and committees.

In line with our objectives, we have the tremendous pleasure to announce the 2017 ESO Conference which will be held at the Dubai International Convention & Exhibition Centre in Dubai, United Arab Emirates, from December 14 - 16 2017. ESO Conference is recognized as the forerunner amongst the educational, scientific and networking meetings for the ophthalmology community in the gulf region.

In each iteration, ESO conference conveys publishable, applicable and progressive presentations, advanced cutting edge research from a variety of perspectives and this year will be no different.

Themed concurrent sessions will provide a cross-sectional appeal for our diverse audience. Time has been incorporated into the program to cater a multitude of networking and partnership-building opportunities.

With temperatures in the cool 20s, December is the perfect time to visit Dubai and enjoy a kaleidoscope of attractions such as Burj Khalifa, the tallest building in the world and the centrepiece of Downtown Dubai; the Dubai Mall, the world's most visited and largest shopping & entertainment destination; Atlantis, the Palm which houses the Aquaventure water park and the lost chambers aquarium, among many others. Delegates can also avail discounted rates on a variety of tours such as traditional dhow cruises, desert safaris or desert BBQ dinners.

We look forward to seeing you in December 2017!

Dr. Saleh Saif Al Messabi, FRCS (CANADA)

President, Emirates Society of Ophthalmology
Conference Chairperson
